

Junior SDET / QA Automation Engineer – Job Description

About the Role

We are looking for a passionate Junior SDET to join our QA team. This is an entry-level role for candidates who are interested in software testing, automation, and quality engineering. You'll work closely with developers and senior QA engineers to ensure high-quality web and API applications.

Responsibilities

- Understand product requirements and test scenarios
- Write and execute manual test cases
- Learn and contribute to test automation (UI/API)
- Report bugs clearly with steps, screenshots, and logs
- Perform regression and smoke testing
- Help maintain test reports (Allure/TestNG/JUnit, etc.)
- Participate in sprint planning and daily stand-ups

Required Skills (Basic Level)

- Basic knowledge of software testing concepts (SDLC, STLC)
- Understanding of manual testing and test case writing
- Basics of any one programming language (Python/Java preferred)
- Familiar with web applications & browsers
- Basic understanding of API testing (GET/POST)
- Willingness to learn automation tools (Selenium / Playwright / Cypress)
- Good communication and problem-solving skills

Good to Have (Not Mandatory)

- Basic automation exposure (Playwright/Selenium)
- Familiarity with Git/GitHub
- Knowledge of SQL basics
- Any testing project or internship experience

Qualifications

BE/BTech/MCA/BCA or any relevant degree. Freshers or 0–1 year experience welcome.

What You'll Learn

- UI automation using Playwright/Selenium

- API automation using Python/Java
- CI/CD integration (Jenkins/GitHub Actions)
- Test reporting & debugging in real projects
- Industry best practices in QA and automation

Why Join Us

- Great learning environment
- Mentorship from senior QA engineers
- Opportunity to grow into Automation Engineer / SDET role
- Friendly team and real-world project exposure
